An EcoTrend saves you
more than money.
It saves the environment.

ECOTREND

REMANUFACTURED LASER TONER CARTRIDGE BY

TRENDSETTER
MEDIA

An EcoTrend respects world resources.

Each year millions of used laser cartridges are dumped. This is non-biodegradable waste. An EcoTrend utilises an existing cartridge to make a recycled, yet superior, product.

Innovative ideas give EcoTrend the quality and competitive edge over its competitors.

We're one of the first companies in Australia to introduce heat seals which match OEM standards so toner leakage and humidity effects are eliminated. And we use microwave technology to clean corona wires.

Save up to 50% on EcoTrend.

EcoTrend offers substantial savings when compared to original cartridges.

EcoTrends are built in-house.

Trendsetter employs fully-trained technicians to remanufacture cartridges. Quality control is guaranteed.

An EcoTrend is the result of the latest technology.

Our affiliation to the successful pioneers of the remanufacturing technology in the USA and Europe means we're constantly updated on new technology breakthroughs. And we strictly adhere to their methodology.

EcoTrend is 100% guaranteed.

A demanding check-in, pre-test inspection, certification and out-bound tests ensure you

receive a remanufactured laser cartridge which meets, or exceeds, OEM and industry standards. This guarantees you have one of the most reliable laser cartridges on the market.

High yield EcoTrend will last longer.

Unique compatibility of blended toner to drum ensures improved toner transfer efficiency, ie less toner to the waste hopper within the cartridge, thereby giving it a greater yield capability, and increased drum life expectancy. In addition, we fill our cartridges with up to 10% more toner than our competitors.

Your EcoTrend helps save Australia 4 to 5 million dollars a month.

A large amount of cartridges are recycled in Asia. EcoTrends are remanufactured by us in Brisbane so Australian dollars stay here and thirty Australians remain employed.

Queensland Government Approved.

AS - 1987/ISO9001 - 1987

Certificate No.257 awarded 4/7/91.

Trendsetter Media was one of the first companies to fully implement a Quality Management System based on the Australian Standard. Trendsetter Media is a member of the International Cartridge Recycling Association.

Save money.

EcoTrend Renew Inkjet cartridges offer substantial savings when compared to original inkjet cartridges.

You can save up to 50%!

Save the environment.

The EcoTrend name is synonymous with saving the world's resources. Now, EcoTrend Renew Inkjets allow you and your company to contribute to the Australian ecology, economy and employment by keeping empty cartridges out of the waste stream.

Save time. Save mess.

When we renew your inkjets you avoid a messy and time-consuming operation best kept out of the office place.

Experience counts.

We are affiliated to the largest non-OEM manufacturer in the USA of ink jet inks and share their fifteen years experience in developing and producing ink jet inks.

Ink quality that meets or exceeds OEM specifications.

A proprietary filtration system filters ink down to 0.1 microns. The dyes are then purified by "Reverse Osmosis", a process that removes salts and heavy metals which can corrode and clog print cartridges and purge lines.

Clean room manufacturing environment.

We have purpose-built a room which is humidified and temperature controlled to achieve optimal conditions for cleaning and renewing ink jets.

This tight, environmentally-restricted room is totally separate from our laser cartridge remanufacturing operation.
